## Ackenberry Trout Farms

We are a central Alberta family fish farm, located between Edmonton and Camrose. We have satisfied customers across Alberta. For over eleven years we have supplied Rainbow & Brook trout for pond and commercial users as well as carp, pond supplies and advice.

Our environmentally friendly indoor recirculating facility is **Certified Disease Free** with a current Department of Fisheries and Oceans certification.

Besides supplying healthy fish for your pond we offer helpful advice and all pond equipment to help in making a healthy pond from stocking, wintering, to catching your fish.

The popular **Blue Pond Dye** is used to help control pond weeds, algae, and predators. It is safe to use with fish and is often used with grass carp. True Blue is formulated to filter sunlight penetration for weed control. We supply pond dye in easy to use water-soluble packets.

Check out all the aeration equipment available. In short, aerating your pond will protect your fish, help prevent winter kill as well as keep your pond cleaner.

## Do I need a licence to stock trout?

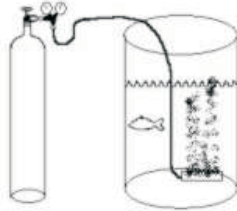

To stock ponds in Alberta you require a Recreational Fish Culture Licence. To obtain a licence apply at your nearest Agriculture Food & Rural Dev. office or phone **780 427-5083**. Licence cost is \$10.00 a year. *We can not release the fish without this licence.*

## How do I get the fish home?

We encourage you to pick up your fish right at the farm to view pond products, aerators and other equipment, tour the facility and perhaps get extra advice on raising trout. All you need to bring for smaller orders is a clean container (plastic garbage can or large totes) in which we place heavy bags, filled with water and saturated with oxygen. *(We can supply containers at the farm for a \$15.00 deposit.)*

For long hauls and larger fish you will need a barrel or tank, a full oxygen bottle and regulator. **We have airlines and air stone kits available.**

Ackenberry Trout farms can also deliver your fish. **Order by April 15 to**

**arrange to have fish delivered.** Most delivery prices range from \$75 - \$150 per stop to yard depending on distance.

## Feeding your fish?

You may need to hand feed your trout depending on the amount of natural food in your pond. Feeding your fish can be very therapeutic and great family fun. **Ackenberry carries quality BC fish food.**

## Triploid Trout!

These female Rainbow Trout are sterile, putting energy normally used for egg production into growth! This results in huge trout.

## Grass Carp!

Grass carp can play an important role in natural pond weed management instead of using dangerous herbicides. Note: *When herbicides are used, timing and quantity of the herbicide is crucial. You may risk killing your fish.* Grass carp should be stocked at a rate of 20 carp / 1/2 acre. *You are required to have carp included on your licence)*

## Healthy Ponds for Happy Fish

We carry many products including fountains, a vast variety of aeration equipment, Blue pond Dye, various test kits for oxygen, PH levels as well as many other products to keep your pond clean, clear and healthy! Check our catalogue for product listings.
