

# Muck Pellets & Muck Pellets PLUS

Reduce Bottom Sludge, Murky Water & Phosphates

Pond Pro Muck Pellets & Muck Pellets PLUS are a premium Canadian-made bioremediation product containing 5 species of bacteria designed to reduce and prevent sludge buildup. This formula is made in an easy to apply, professional grade tablet.

## Benefits

- Eats away at sludge & muck
- Clarifies water, reduces murkiness & turbidity
- Removes nutrients and sediments
- Removes odours
- Reduces nutrients available to weeds and algae
- Breaks down organics
- Lowers pH for better irrigation

## Applications

- Ponds
- Lakes
- Dugouts
- Fish ponds
- Sewage lagoons
- Golf courses & residential developments
- Koi ponds
- Stormwater retention ponds
- Drinking water reservoirs

## Product Features

- Easy to apply
- Small pellet for easy application
- Odour Free
- Completely natural and chemical free
- Safe for livestock & wildlife
- Double the concentration of similar products!
- 5 species formula
- Muck: 2 billion bacteria concentration
- Muck PLUS: 5 billion bacteria concentration
- Contains sludge eating bacteria, enzymes & minerals
- Available in 2.5kg, 5kg, or 12.5kg pails

# Muck Pellets & Muck Pellets PLUS

## Muck Pellets or Muck Pellets PLUS? Which one is right for you?

Our Muck Pellet original formula is sufficient for most ponds. We created our extra strength Muck Pellets PLUS formula to give our original formula an extra kick! Muck Pellets PLUS contains more than double the bacteria concentration compared to our original formula. Muck Pellets PLUS is recommended for problem ponds/lakes, or if you want to keep your pond or lake at its peak!

## How it Works

Muck Pellets & Muck Pellets PLUS work by providing good bacteria to your pond to create a healthier and more balanced ecosystem.

Muck Pellets & Muck Pellets PLUS work by sinking to the bottom and settling in the sludge at the pond bottom. The bacteria and enzymes in the pellets then eat away at the sludge. This bacteria also uses up the nutrients that algae and weeds would otherwise thrive on. This works faster with good aeration and water movement, which allows the bacteria to multiply faster.

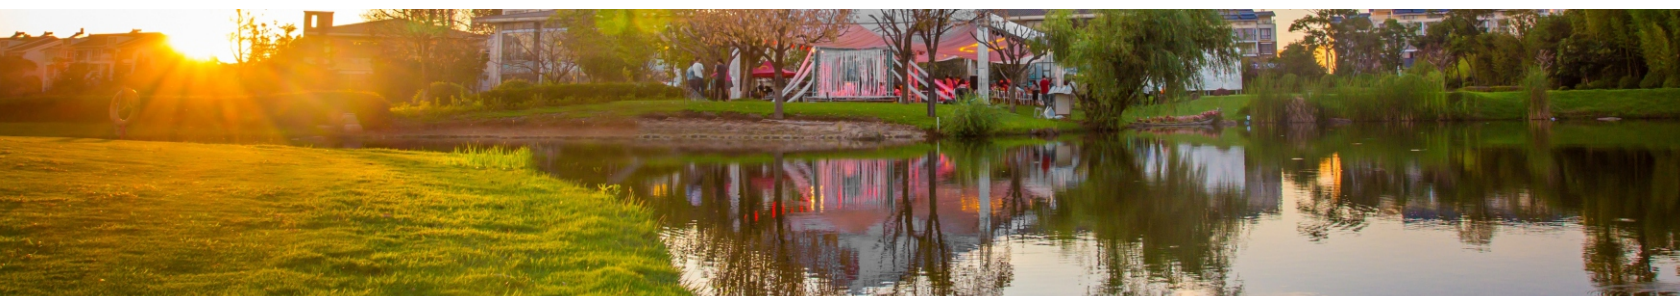

## Application Rates

Area	First Treatment	Maintenance Treatment (Every 4 weeks)	Eutrophic or Problem Ponds (Every 2 weeks)
Small ponds 10' x 10'	1 handful 5-10 tablets	5 tablets	5 tablets
1000 <sup>2</sup> m ¼ acre	2.5 kg	1 kg	1 kg
2000 <sup>2</sup> m ½ acre	5 kg	2 kg	2 kg
4000 <sup>2</sup> m 1 acre	12.5 kg	5 kg	5 kg
1 hectare ~ 2.5	25 kg	10 kg	10 kg

For eutrophic or problem ponds, or best results: use Muck Pellets PLUS Formula at the rates above

## Application Instructions

Muck Pellets & Muck Pellets PLUS should be applied at the beginning of the season, once the pond or lake is completely ice-free, with a heavy treatment to kick start the process. Maintenance applications should be applied every two to four weeks for as long as the pond or lake remains completely ice-free. To apply, simply toss in the pond so the pellets are distributed evenly across surface area. This treatment is all-natural and very safe! This means precise measuring is not required - you can safely treat your pond with higher application rates with no risk of harm to your pond or aquatic wildlife. If pond has a history of being difficult to manage or growing excessive vegetation, it can safely be treated at higher application rates or frequency.
